MnTC Goals: Goal LS - Upper Division Liberal Studies, Goal 05 - Hist/Soc/Behav Sci, Goal 08 - Global Perspective

This course investigates the global geography of the world's three monotheistic religions: Judaism, Christianity, and Islam, interrogating why these traditions emerged in particular places and how they dispersed across the globe. Students will gain basic map reading skills and hands-on experience using a web-based geographic information system (GIS) as a tool both for researching religious traditions and presenting knowledge to others. This course emphasizes the role of political and economic geography on religious beliefs and practices in different regions, historically and today, using case studies from southwest Asia and Europe. In addition to mapping, geographic topics include the interplay between religious traditions and the natural environment, concepts of sacred place and space, and geographic trends in secularization.
