A. Course Description

Credits: 4

Prerequisites: 
   - MIS 310 Principles of Management Information Systems
   - OR
   - DATA 211 Data Science and Visualization

Lab Hours/ Weeks: Corequisites: None

Lecture Hours/ Week : MnTC Goals: None

Business Intelligence is the user-centered process of exploring data, data relationships and trends - thus helping to improve overall decision making for enterprises. This course addresses the iterative processes of accessing data (ideally stored in the enterprise data warehouse) and analyzing data in order to derive insights and communicate findings. Moreover, the course also addresses the use of software tools for analysis and visualization of data, especially report design along with the use of dashboards.

B. Course Effective Dates: 01/12/2015 - Present

C. Outline of Major Content Areas:

See Course Description for major content areas.

D. Learning Outcomes (General)

1. Analyze data to generate information and knowledge that lead to informed decisions for businesses
