A. Course Description

Credits: 

Prerequisites: PSYC 407 Professional and Career Applications of Psychology

Lab Hours/Weeks: Corequisites: None

Lecture Hours/Week: 

MnTC Goals: None

In this course, students apply their knowledge of theories, concepts, facts, ethics and ways of thinking in psychology to a real-life work or volunteer setting. Students reflect upon how their work experiences relate to the discipline of psychology. Students perform reflective self-evaluation and integrate careful consideration of ethical standards into their applied experience. PSYC 407 is a required prerequisite. ** Note: this is a variable credit course with credit range of 3 - 4.

B. Course Effective Dates: 05/07/2019 - Present

C. Outline of Major Content Areas:

See Course Description for major content areas.

D. Learning Outcomes (General)

1. Compare and contrast the conceptualization of psychological theory in an academic/classroom setting to the conceptualization of psychological theory in an applied work setting.
2. Implement appropriate ethical behavior according to the American Psychological Association Ethical Principles and Code of Conduct.
3. Examine how one's career interests and perceptions of one's strengths/weaknesses change over the course of the applied experience.
4. Demonstrate an understanding of, and compliance with, work expectations as agreed upon with one's supervisor at the applied experience.
5. Appraise one's learning experience regarding psychology in an applied setting.

E. Learning Outcomes (MN Transfer Curriculum)

This contains no goal areas.

G. Special Information

None
