A. Course Description

Credits: 1

Prerequisites: NURS 608 Epidemiology

Lab Hours/ Weeks: Corequisites: None

Lecture Hours/ Week :

MnTC Goals: None

This practicum provides students with a guided experience in the application of epidemiological and population health concepts presented in NURS 608. Students work to design a community-based, culturally relevant health promotion, disease prevention or management plan. Students create and present a patient education offering, community service message or a communication strategy related to their plan. Practicum experiences are individually designed through the use of learning contracts in consultation with the NURS 608P instructor.

B. Course Effective Dates: 01/13/2014 - Present

C. Outline of Major Content Areas:

See Course Description for major content areas.

D. Learning Outcomes (General)

1. Use knowledge of illness and disease, epidemiological, social, and environmental data to identify health concerns within population groups;
2. Evaluate the effectiveness of prior interventions or approaches related to the identified health concern;
3. Engage with stakeholders to identify and incorporate culturally relevant prevention or promotion strategies and communications into the health promotion plan;
4. Synthesize theories and evidence-based knowledge into the design of a community-based disease prevention or health promotion plan;
5. Design and present a culturally relevant communication plan, health education offering, or public service campaign to advance the disease prevention or health promotion plan.

E. Learning Outcomes (MN Transfer Curriculum)

This contains no goal areas.

G. Special Information

None
