HSCD 635 : Integrated Care: Advanced Practice

A. Course Description

Credits: 4

Prerequisites: HSCD 632 Integrated Care: Harm Reduction and Case Management AND HSCD 681 Practicum I

Lab Hours/ Weeks: Corequisites: None

Lecture Hours/ Week :

MnTC Goals: None

Advanced practice of co-occurring disorders counseling requires excellence in clinical skills, program innovation and application of professional ethics. In this course, students build on their coursework and practicum experiences to gain advanced proficiencies in diagnostics, evidence-based practices and ethical decision-making. Students expand their competence in assessment and diagnosis of substance use, mental health and co-occurring disorders. Students examine the advancement of practice through emerging technologies and address barriers to implementation. Case studies that present especially challenging ethical dilemmas are considered and resolved through collaborative means. Special attention is paid to the responsiveness of professional counseling practice to the needs of clients from marginalized communities.

B. Course Effective Dates: 01/09/2017 - 12/10/2017 12/11/2017 - Present

C. Outline of Major Content Areas:
