Lab Hours/ Weeks:

Corequisites: None

Lecture Hours/ Week :

MnTC Goals: None

Surveys of the skills desired by potential employers of graduate management students indicate that use and understanding of technology and its impact is highly valued. In this course you have the opportunity to examine technical architecture and build your skills while learning how to incorporate technology into your management "portfolio." The course uses case studies to review state-of-the-art equipment in each of the basic software and hardware families, while emphasizing management models and higher-level analysis using the computer. Practical projects are assigned giving students real-world opportunities to use these tools to enhance their work and build productivity. Participants will complete a comprehensive and highly practical class project and final exam.

B. Course Effective Dates: 08/24/2002 - 05/03/2017 05/04/2017 - Present

C. Outline of Major Content Areas:

See Course Description for major content areas.

D. Learning Outcomes (General)

None
