A. Course Description

Credits: 4

Prerequisites: NURS 604 Research Methodology

Lab Hours/ Weeks: Corequisites: None

Lecture Hours/ Week :

MnTC Goals: None

This course focuses on skills needed to find and critique a body of health-related literature and the application of evidence-based nursing practice. Content includes translational research approaches and evidence-based practice concepts. Students synthesize a body of health-related literature relative to application in an evidence-based practice model. Competence Statement: Knows evidence-based practice concepts well enough to synthesize evidence from multiple studies and combine it with the expertise of the practitioner as well as the patient preferences and values in the delivery of doctoral level advanced nursing practice.

B. Course Effective Dates: 08/19/2019 - Present

C. Outline of Major Content Areas:

See Course Description for major content areas.

D. Learning Outcomes (General)

1. Critique research methodology used in evidence.
2. Evaluate analytical methods used in evidence.
3. Evaluate methods for conducting critical, systematic reviews of health-related literature.
4. Apply research appraisal tools to evaluate the quality of evidence.
5. Synthesize evidence from multiple sources to inform advanced nursing practice.

E. Learning Outcomes (MN Transfer Curriculum)

This contains no goal areas.

G. Special Information

None
